## CONSTRUCTION MANAGEMENT

### A SINGLE SOURCE SAVES MORE THAN TIME

What is your time worth...or your effort? By using ROHN as your single source turnkey communications provider you can save both, efficiently and economically.

The ROHN Construction Group, located at our World Headquarters in Peoria, IL, has direct and immediate access to company management, engineering, production and shipment to provide you with the highest quality products and the widest range of services in the industry.

This direct and simple line of communication saves time and eliminates long distance contact between the manufacturer and installer. It enables us to answer questions internally before they have the chance to grow into costly delays.

We employ professionals with the expertise required to provide you a fully turnkey communication project. We understand your needs, and when your job becomes a ROHN Construction Group project we assign a single staff member to take charge. With one person in authority you have a knowledgeable contact, and one place to go for all answers, changes in scope of work, and all other assistance required.

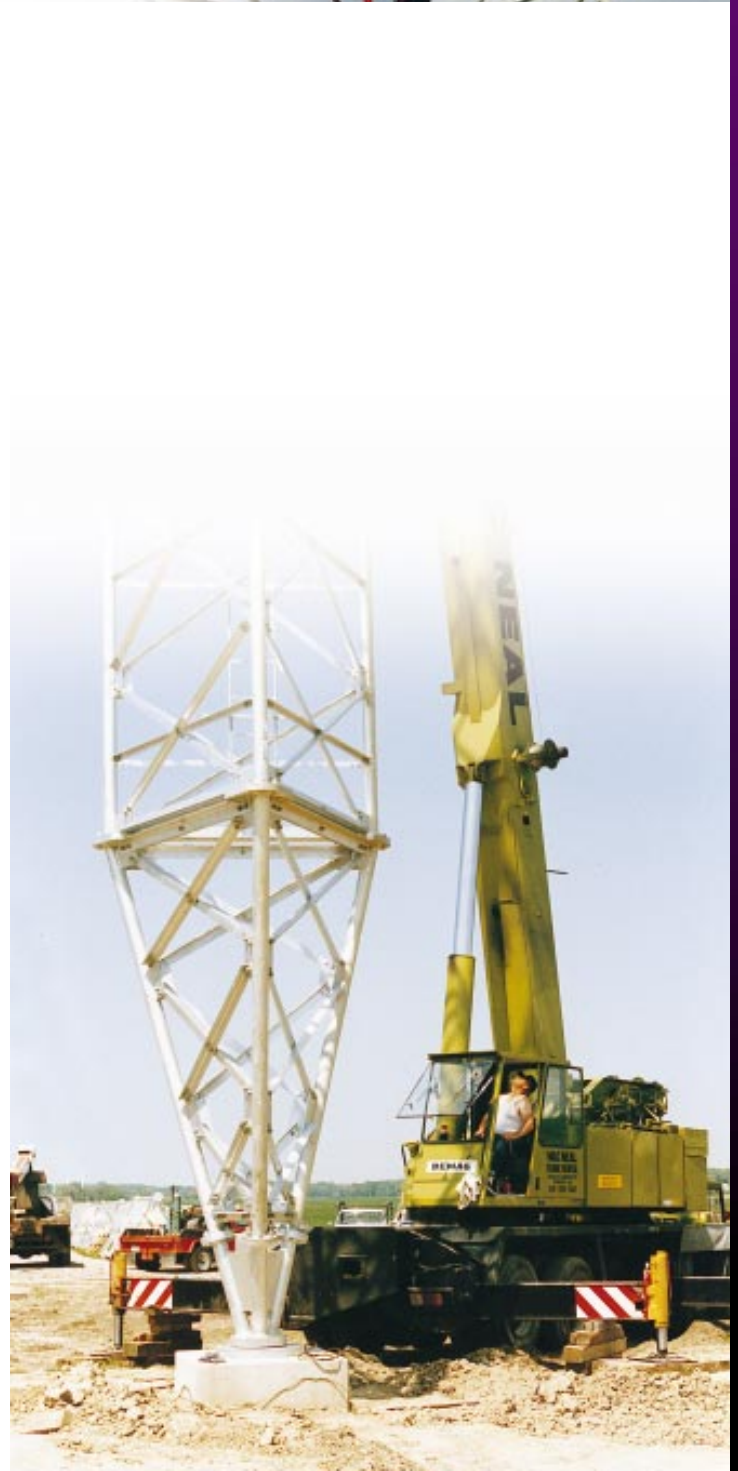

The ROHN Construction Group exceeds all customer expectations when providing the requirements to complete your site to your specifications, including:

- RF Design
- Site Identification
- Site Search
- Site Acquisition
- Certified Shelter and Tower Design Drawings
- Zoning and Permitting Assistance
- Environmental Studies
- Geotechnical Services
- Site Preparation
- Civil Construction
- Tower Foundations
- Equipment Shelter Foundations
- Tower Erection
- Equipment Shelter Installation
- Provide and Install Antennas and Transmission Lines
- Communication Equipment Staging at our Shelter Production Plant
- System Testing
- Security Fencing
- Maintenance and Inspection

At the construction site, one of ROHN's field systems coordinators assists in scheduling and ensures compliance with specifications and drawings. As full time ROHN employees, the systems coordinators are experienced in all phases of the installation and they give the customer an on-site company contact in addition to the office staff member in charge of the project.

At any time, you can be assured of the updated status of all phases of your project without having to contact multiple manufacturers and contractors. Even after your project is complete, the ROHN Construction Group can continue to work for you by providing all the information and expertise required to properly inspect and maintain your products. Ask about our unique 20 year extended warranty on installations by our ROHN Construction Group.

With over 50 years experience, what company could be more qualified to provide single source turnkey installation services more quickly or efficiently than ROHN? Nobody knows the products and installation methods the way ROHN does. Rest assured that ROHN is there to fulfill all your specification requirements.
